RESPONSE TO AMENDMENT

This Office Action is in response to an amendment filed on 08/14/2006. Claims 1-9 and 14-16 have been amended. Claims 1-19 are currently pending and have been examined in this Office Action.

Election/Restrictions

The Examiner agrees with the Applicants' statement on page 5 of the disclosure that this application contains claims directed to three patentably distinct invention: Species 1 (first technique, comprising adding lifetime limiting information to the information picture. See page 5, paragraph 3); Species 2 (second technique comprising storing of history relating to recording/updating of information picture. See page 5, paragraph 3); Species 3 (third technique, comprising limiting server transmitted traffic on the basis of information relating to information picture. See page 5, paragraph 4 and the first line of page 6).

Related inventions are distinct if the inventions as claimed are not connected in at least one of design, operation, or effect (e.g., can be made by, or used in, a materially different process) and wherein at least one invention is patentable (novel and nonobvious) over the other (though they may each be unpatentable over the prior art). See MPEP § 809.01(II).

In the instant case, the Species 1, 2 and 3, by the Applicants' own admission, are distinct at least in the mode of operation, which is clearly evidenced by at least the referenced above corresponding portions of the disclosure.

The Examiner has determined that the operational steps present in Species 1 would not be an obvious variation of operational steps present in Species 2 or 3 to one of ordinary skills in the art at the time the invention was made. Therefore, Species 1-3 are patentably distinct from one another, though they may each be unpatentable over the prior art.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should the Applicants traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2155

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to the applicant's representative (Mr. Thomas F. Presson, Reg. No. 41,442) on January 12th, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Conclusion

Applicant is given **ONE (1) MONTH, or THIRTY (30) DAYS** from the mailing date of this communication, whichever is longer, within which to respond to this election/restriction requirement in order to avoid abandonment (35 U.S.C. § 133). Extensions of this time period may be granted under 37 CFR 1.136(a).
